TOP 10 Elementary sectors ATC Capacity

FOCUS ON CAP

CAP Collaborative Advanced Planning
A dynamic CDM approach for balancing traffic demand through congested sectors and reduce delays

- ▶ 15 airlines
- ▶ 3 ANSP (DSNA, skyguide, Enaie)
- ▶ Since S15, 5000+ requests of FPL change (4300+ actually done and updated on the website) on 6 traffic flows.
- ▶ Saved minutes of delay
- ▶ Extension through SESAR PJ24 with more NM involvment.

Open collaborative space between ops stakeholders (AO/ANSP/NM)

2018 perspectives

Collaboratives ATFCM measures MAC18 (DSNA):

- Focus on the TOP 10 hotspots
- Focus on the first rotation (avoid reactionary delay)
- Extension of CAP proposal with other ANSPs and AOs involving NM
- Roster evolution in Marseille
- Post ops tool developpement to share common view

Collaboratives ATFCM measures in the core Area:

- RAD or scenario coordinated in the core area to avoid multiple regulation (4EC and FABEC ATFCM Group)

2018 perspectives

Airspace design evolutions planned for 2018:

- 1st Feb 2018 : New Marseille ACC / Provence APP Interface (IAM)
- 1st Mach 2018 : GT ESSO (new organization South West of Bordeaux ACC) and SWAFFLE (new sectors > FL375 in North of Bordeaux ACC)
- 29th March 2018 : New Reims ACC sector YB
- 29th March 2018 : Rodez APP managed by Clermont APP

- Nov 2018 : Extension of Jersey Delegation (tbc)
- Nov 2018 : Extension of Iroise APP (tbc)
